## November Demonstration

Paul Pierrman demonstrated the use of the Robert Sorby texturing tool.

In the demonstration he embellished the top of a box. First by creating a flower in the center and then texturing around it.

He runs the lathe between 400-500 rpm (depending on the size of the piece) and sets the tool rest approximately 3" away from the piece.

Hobby Lobby has a colored wax that highlights the texturing.

## President's Message ...

Dear OWT members,

I look back on this past year of the Ozark Woodturners and see many positive things. We have gotten mostly back to normal following a significant interruption during the Covid epidemic. Our meetings were better attended as the year progressed, and we have seen a number of new members, which is always encouraging.

My tenure as President is coming to an end at the end of December, and we will begin 2023 with a mostly new cadre of officers. I ask that you support our new President, Steve Wagner, and the other officers and look for opportunities to assist them in making this coming year an enjoyable and informative experience for all the members. Please consider volunteering for Club events and activities when asked. The Club will only be

successful if everyone contributes.

Please join us for our Christmas brunch on Saturday, December 10<sup>th</sup> at the VFW. Bring your spouse, significant other or a friend who might be interested in our Club. We will have some great food, conversation and door prizes. There will be no business agenda or demonstration.

In the meantime, enjoy some time in your shop and turn safely.

*Ed Boiteau, President*
